Cumulative S/N vs l_max: ours vs La Plante+22 Fig. 10 (Roman HLS, f_sky = 0.053, their shot noise)
SO (post-ILC noise, with shot noise)
CMB-S4 (post-ILC noise, with shot noise)
CMB-HD (post-ILC noise, with shot noise)
cumulative S/N (best single redshift bin)
no modes in our 300 Mpc box
