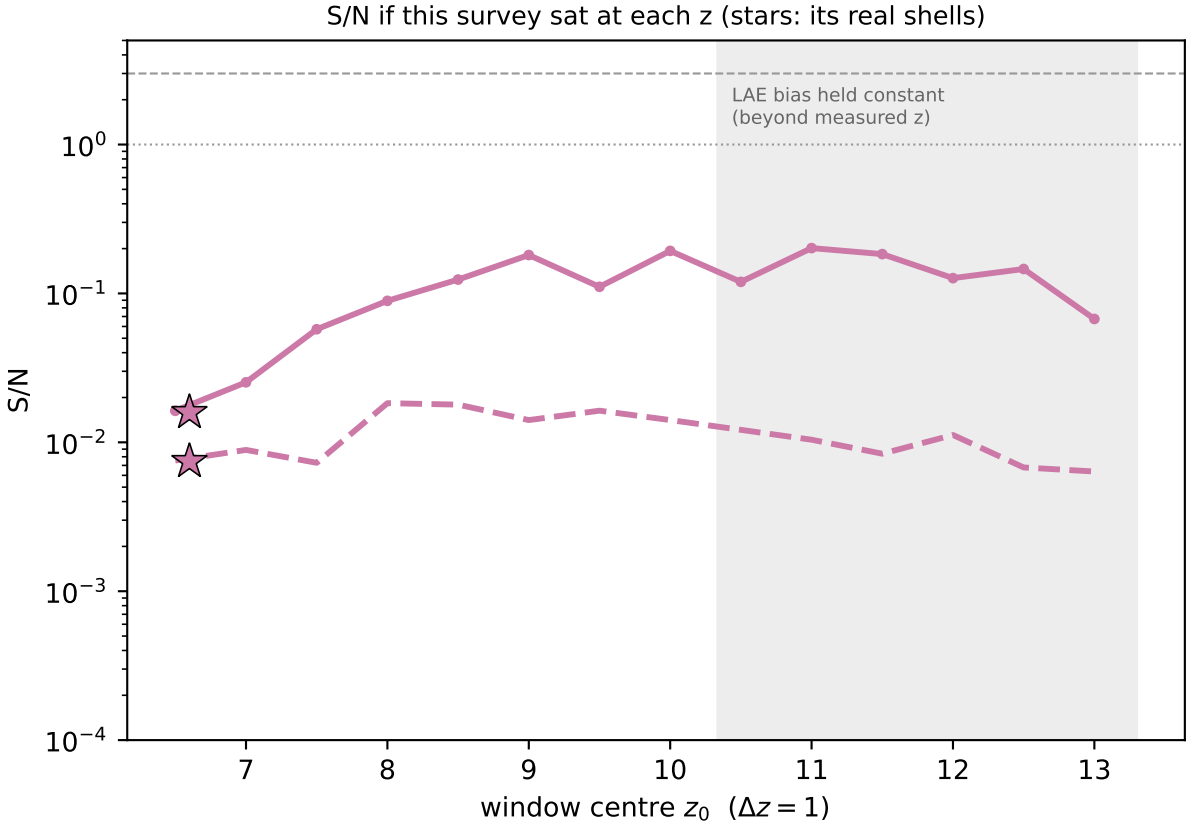
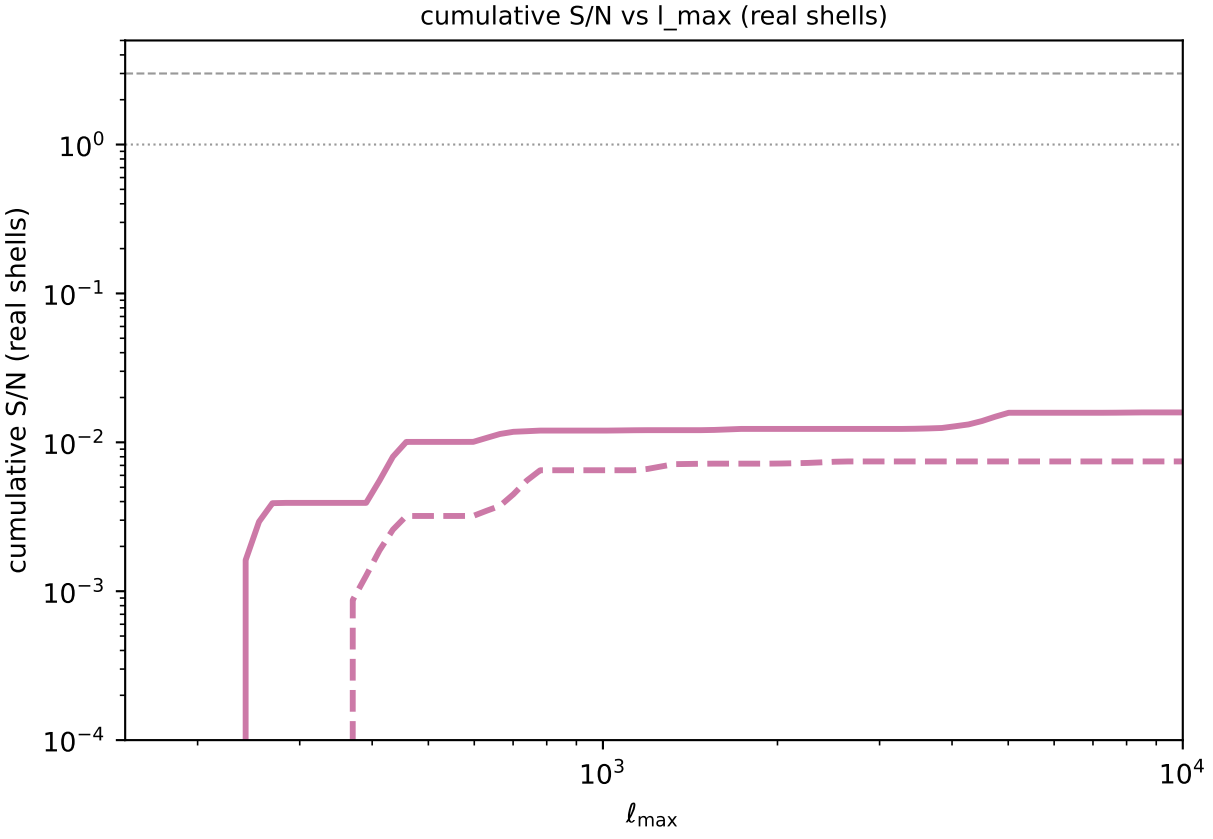
pair 1: ACT DR6 x HSC SILVERRUSH z~6.6 (existing data)
LAE survey: HSC SILVERRUSH (NB816+NB921), 21 deg^2





solid: simulated LAEs (excess not yet confirmed)
dashed: La Plante's galaxy model (validated; may be low by up to 2x)
thick: post-ILC noise (white only for ACT / SPT-3G)
thin: white (instrument) noise
1σ
3σ

La Plante's galaxy model, white noise: 0.0074
simulated LAEs, white noise: 0.016
