Which redshift bin wins: ours vs La Plante+22 Fig. 9
(matter x W16 bias, Roman HLS f_sky = 0.053, their shot noise)
CMB-S4 post-ILC with shot noise: S/N per single bin
bin width Δz
bin centre z_0
S/N
ours: max 2.1 at z0=8.5, dz=3
La Plante Fig. 9: max 2.8 at z0~9.2, dz~4.2
